The International Conference ‘Raising standards in citizenship education: ideas, ideals and issues from around the world’ will focus on the contributions to enhancing educational standards within citizenship education and also from citizenship education to other educational contexts. We are interested to know how high standards are achieved within citizenship education programmes. We wish also to explore the ways in which citizenship education programmes contribute to the achievement of high standards in other curriculum areas, to whole school issues and to other educational matters.

Proposals that explore matters from qualitative and/or quantitative studies are welcome.

The conference is supported by the journal *Citizenship Teaching and Learning*. Conference papers of good quality will be referred to the journal for consideration for publication.
